Subject: Microsoft settlement

I would like to take this opportunity to state emphatically about how I feel about the settlement with Microsoft. This was another case of blatant assault on private industry by a so called president, and Justice Department that only served to spend more tax payer money. I applaud the manner in which John Ashcroft and the current Justice Department handled this situation to restore the tech industry and the confidence of it's investors. The down turn in the Nasdaq, and specifically the tech industry can be traced to the beginnings of this ridiculous lawsuit. Please keep this settlement in place, or we can only look forward to more of the same in the capital markets. I would like to take this opportunity to also tell you what a wonderful job our real Justice Department is doing for this great United States!! ThankYou!
